# CONTACT

This short version of the Design Manual is developed in April 2021. The project has been a collaborative effort between Geno SA and Ferskvann Reklamebyrå.

All contacts and questions regarding the graphic profile and use of logos shall be directed to the persons below. This version is a simplified version created for users to have easy access to our brand identity. For a more detailed information, please contact:

# LOGO VARIATIONS

[DOWNLOAD FILES](#)

All logos are available in a positive (colour) version, in addition to the white and black versions.

We prefer that our logo is used in the positive version against a white background.

The white and black versions are used when appropriate, for example against a background where the contrast is too poor.

## Primary usage:

**NORWEGIAN RED**

**NRF**

## Secondary usage:

**NORWEGIAN RED**

**NRF**

**NORWEGIAN RED**

# LOGO SHIELD

[DOWNLOAD FILES](#)

Only for limited use when appropriate and when the brand name is taken care of in the context.

The intended use of these logos is in potential customer loyalty programs or similar.

All use must be approved by Brand Manager(s).

# LOGO - SAFETY AREA

To ensure favourable logo placement, a protective zone is defined around the logo.

The protective zone is defined as the minimum distance to other elements. When placing the logo at the edge of a format, the minimum distance is also the minimum permitted margin.

The minimum distance **(M)** is defined as the height of the **bull** in our logo shield. This rule applies to all variations of the logo.

**NOTE:** this is the minimum permitted distance; the more «air», the better.

## Scaling of logo

Scaling shall always be proportional. The logo must not be «stretched».

# CO-BRANDING

[DOWNLOAD FILES](#)

Separate compilations of the Norwegian Red and Geno logo have been developed. Original files must be used.

Geno logo can also be placed subordinate and in a smaller size than the Norwegian Red logo and with additional text “Brought to you by:”. See examples at the next page.

# DISTRIBUTOR / PARTNER

## – SENDER INFORMATION

Norwegian Red must always be given first priority and placed at the top (as the sender). Sometimes in collaboration with Geno. Distributor / Partner logo and information should always be placed subordinate at the bottom of the composition. See some basic examples below.

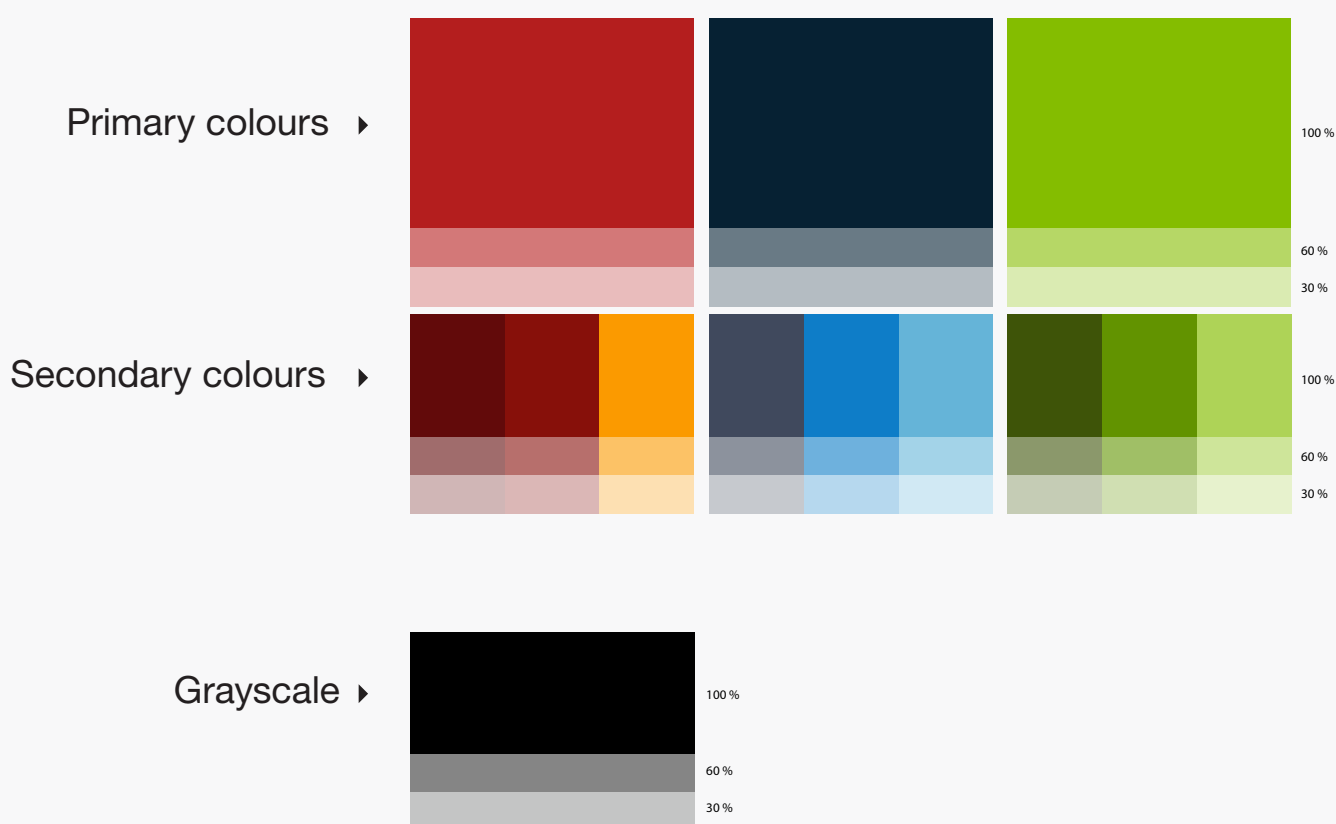

# COLOURS

The red and the dark blue color originate from the logo and should mainly form the main color expression in the profile. It is also desirable that the green color should be emphasized in our color expression.

The secondary colors can be used in combination with the main colors and are used when more colors are needed.

Toned-down versions of the colours may be used, for example, in text boxes and other contexts in which it is desirable to have a more subdued and subtle use of colours.

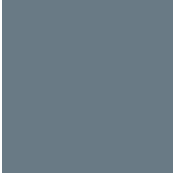

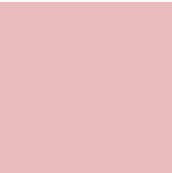

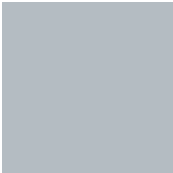

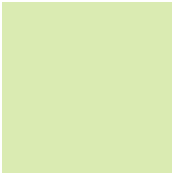

For the website, a separate matching color palette has been adapted.

# COLOURS - DEFINED

## Primary colours:

---

# TYPOGRAPHY

[DOWNLOAD FONT](#)

## Profile font: Montserrat (Google font)

The profile font shall be used in all marketing and for all commercial applications. Montserrat can be downloaded for free from [fonts.google.com](https://fonts.google.com) and installed on your computer.

Montserrat shall be used in all external/ professionally produced printed and digital materials. Examples of this include the following: web, SOME, ads, brochures and other advertisement and marketing material produced by advertising agency, newspaper or other design specialists.

## Alternative font: Arial

Arial may be used in self-produced materials such as template-based internal productions of letters, reports and Power Point presentations – or only in cases in which Montserrat is not available.

## Cursive

Cursive letters must be avoided and should never dominate the typographical expression. The use of cursive letters should only be used to emphasize particular words in the main text.

# PAYOFF

[DOWNLOAD FILES](#)

The payoff (mission statement) is developed as a design original. It is a fixed and defined critical element of our identity. The design original shall always be used when using the payoff – other versions may not be used. With the exception when the payoff is a part of a running text.

The payoff may be used in both positive and negative image versions. White background is preferred, when possible.

As a main rule, the size of the payoff should be smaller than the logo.

"Avler for bedre liv" is for use in Norway only.

Breeding for better **lives**

---

Avler for bedre **liv**

# GRAPHIC ELEMENT

[DOWNLOAD FILES](#)

This element must be used where appropriate.  
The intent is to reinforce the connection to Norway and Geno.

The element should be placed at the top left, as shown in the example.

Example of correct placement:

**Proven by Geno,  
Norway**
